Re: **Remediation General Permit**

Notice of Intent

Mobil Facility R/S #12369 (#01-E5Y) 95-97 Westford Road Tyngsborough, Massachusetts

RTN 2-11257 (2-13702) NPDES Exclusion MA-04I-104

Dear Mr. Webster:

GSC|Kleinfelder, on behalf of Exxon Mobil Corporation (ExxonMobil) is currently operating a groundwater extraction and treatment system at 95-97 Westford Road, Tyngsborough, Massachusetts. The remediation system is operating under the Massachusetts Contigency Plan (MCP) and the associated comprehensive response actions have been assigned release tracking number (RTN) 2-11257 by the Massachusetts Department of Environmental Protection (MADEP).

The operation of this remediation system is currently occurring under National Pollutant Discharge Elimination System (NPDES) Exclusion Permit MA-04I-104, issued November 1, 2004. A prior NPDES application (Forms 1 and 2C) has not been filed for this discharge. Operation of the remediation system commenced on September 21, 2005. Pursuant to the "Notice of Availability of the Remediation General Permit" dated September 15, 2005, please find attached a Notice of Intent to continue this discharge activity.

The property located at 95-97 Westford Road (the site) is owned by Warren Allgrove, Jr., of Tyngsborough, Massachusetts. ExxonMobil is the owner of a groundwater extraction and treatment system located at the property. The remediation system is currently operated by GSC|Kleinfelder, an environmental consultant in the employ of ExxonMobil.

Current influent data indicates that the remedial system effluent may potentially exceed the limits for metals concentrations tabulated in Appendix 3 of the Remediation General Permit. GSC|Kleinfelder, on behalf of ExxonMobil, requests that a one-year operating extension be granted to retrofit the existing remedial system as necessary to address these concentrations of metals. The extension is requested in order to maintain compliance with 310 CMR 40.0000 (the Massachusetts Contigency Plan), specifically those sections pertaining to Comprehensive Response Actions. The extension request is viewed to be reasonable given that an existing NPDES Exclusion has been granted for this remedial system.

Please to not hesitate to contact the undersigned with any questions.

Sincerely,

GSC|Kleinfelder

Project Manager

B. Suggested Form for Notice of Intent (NOI) for the Remediation General Permit

1. General site information. Please provide the following information about the site:

a) Name of facility/site : Mobil Facility #01-E5Y		Facility/site address:	Facility/site address: 95-97 Westford Rd.				
Location of facility/site:	Facility SIC code(s):	Street: Westford Rd.					
longitude:71°25'38"latitude:42°39'39"							
b) Name of facility/site owner: Exxon Mobil Con	rporation	Town: Tyngsboro	ugh				
Email address of owner:		State: MA	Zip: 01879	County: Middlesex			
Telephone no.of facility/site owner: (617) 381-285	51						
Fax no. of facility/site owner:(262) 313 1723		Owner is (check one): 1. Federal 2. State/Tribal 3. Private 4. other, if so, describe: Corporation					
Address of owner (if different from site):							
Street: 52 Beacham Street							
Town: Everett	State: MA	Zip: 02149	County: Middlese	ex.			
c) Legal name of operator:GSC Kleinfelder	Operator tele	phone no: (978) 486-0060					
	Operator fa	x no.: (978) 486-0630 Operator email: nstevens@kleinfelder.co					
Operator contact name and title: Nathan Stevens,	Project Manager		. I				

Address of opera	ator (if different fi	rom owner):	Street: 30 Porter Rd.						
Town: Littleton	Littleton State: MA Zip: 01460 County: Middlesex								
1. Has a prior NI 2. Has a prior NI	PDES application (owing: sion been granted for the discharg Form 1 & 2C) ever been filed for e"as defined by 40 CFR 122.2? Y discharge covered under the MA	the discharge? Y	es No X if "yes," date and	l tracking #:				
e) Is site/facility subject to any State permitting or other action which is causing the generation of discharge? Yes X No If "yes," please list: 1. site identification # assigned by the state of NH or MA: 2-11257 2. permit or license # assigned: 3. state agency contact information: name, location, and telephone number: Denise Child, DEP-CERO, 627 Main St., Worcester, MA 01608 (508) 792 7650 beginning the generative storm water general permit; Y \(\subseteq \text{N} \), if Y, number: 1. multi-sector storm water general permit; Y \(\subseteq \text{N} \), if Y, number: 2. phase I or II construction storm water general permit; Y \(\subseteq \text{N} \), if Y, number: 3. individual NPDES permit; Y \(\subseteq \text{N} \), if Y, number: 4. any other water quality related permit; Y \(\subseteq \text{N} \), if Y, number:									
		se provide information about the di			including:				
1 '	-	for which the owner/applicant is s diation system in order to remediat			roleum.				
b) Provide the following information about each discharge: 1) Number of discharge points: 2) What is the maximum and average flow rate of discharge (in cubic feet per second, ft³/s)? Max. flow002 Average flow002 Is maximum flow a design value? YN For average flow, include the units and appropriate notation if this value is a design value or estimate if not available.									
3) Latitude and l pt.4:long.	ongitude of each d lat; pt.5:	ischarge within 100 feet: pt.1:long long lat; pt.6:long	.71°25'25"lat.42° lat	°39'47"; pt.2: long lat ; pt.7: long lat	; pt.3: long lat;; pt.8:long lat; etc.				

4) If hydrostatic testing, total volume of the discharge (gals):	5) Is the discharge intermittent or seasonal? Is discharge ongoing Yes No?
c) Expected dates of discharge (mm/dd/yy): start_09/21/05	end 09/21/10
d) Please attach a line drawing or flow schematic showing water f 1. sources of intake water, 2. contributing flow from the operation	low through the facility including: , 3. treatment units, and 4. discharge points and receiving waters(s).

3. Contaminant information. In order to complete this section, the applicant will need to take a minimum of one sample of the untreated water and have it analyzed for all of the parameters listed in Appendix III. Historical data, (i.e., data taken no more than 2 years prior to the effective date of the permit) may be used if obtained pursuant to: i. Massachusetts' regulations 310 CMR 40.0000, the Massachusetts Contingency Plan ("Chapter 21E"); ii. New Hampshire's Title 50 RSA 485-A: Water Pollution and Waste Disposal or Title 50 RSA 485-C: Groundwater Protection Act; or iii. an EPA permit exclusion letter issued pursuant to 40 CFR 122.3, provided the data was analyzed with test methods that meet the requirements of this permit. Otherwise, a new sample shall be taken and analyzed.

a) Based on the analysis of the sample(s) of the untreated influent, the applicant must check the box of the sub-categories that the potential discharge falls within.

Gasoline Only	VOC Only	Primarily Metals	Urban Fill Sites	Contaminated Sumps	Mixed Contaminants	Aquifer Testing
Fuel Oils (and	VOC with Other	Petroleum with Other	Listed Contaminated	Contaminated	Hydrostatic Testing of Pipelines/Tanks	Well Development or
Other Oils) only	Contaminants	Contaminants	Sites	Dredge Condensates		Rehabilitation

b) Based on the analysis of the untreated influent, the applicant must indicate whether each listed chemical is believed present or believed absent in the potential discharge. Attach additional sheets as needed.

c) For discharges where metals are believed present, please fill out the following:	
Step 1: Do any of the metals in the influent have a reasonable potential to exceed the effluent limits in Appendix III (i.e., the limits set at zero to five dilutions)? Y V N	If yes, which metals? arsenic, copper, lead, zinc, iron
Step 2: For any metals which have reasonable potential to exceed the Appendix III limits, calculate the dilution factor (DF) using the formula in Part I.A.3.c) (step 2) of the NOI instructions or as determined by the State prior to the submission of this NOI. What is the dilution factor for applicable metals? Metals: arsenic, copper, lead, zinc, iron DF: 0	Look up the limit calculated at the corresponding dilution factor in Appendix IV. Do any of the metals in the influent have the potential to exceed the corresponding effluent limits in Appendix IV (i.e., is the influent concentration above the limit set at the calculated dilution factor)? Y N If "Yes," list which metals: arsenic, copper, lead, zinc, iron

4. Treatment system informa	ition. Please de	escribe the treatmen	nt system using separa	ate sheets as necessar	y, including:			
a) A description of the treatment system, including a schematic of the proposed or existing treatment system:								
See attached sheets for a schematic. Groundwater collected through pneumatic pumps is collected into an oil/water seperator, which removes oils (if present) to a product drum inside secondary containment. The collected water continues through an equalization tank, particulate (bag) filters), and air stripper, and three 500 lb. liquid phase granular activated carbon vessels.								
b) Identify each applicable treatment unit (check all that apply):	Frac. tank	Air stripper	Oil/water sep	arator	Equalization tanks	Bag filter	GAC filter	
	Chlorination Dechlorination Other (please describe):							
c) Proposed average and maximum flow rates (gallons per minute) for the discharge and the design flow rate(s) (gallons per minute) of the treatment system: Average flow rate of discharge 1 gpm								
d) A description of chemical	additives being	used or planned to	be used (attach MSI	OS sheets):				
5. Receiving surface water(s)	. Please provid	le information abou	at the receiving water	(s), using separate she	eets as necessary:			
a) Identify the discharge pathway: Direct Within facility_ Storm drain_ River/brook_ Wetlands_ Other (describe):								
b) Provide a narrative descrip Water from the discharge, af approximately 1,400 feet nor traveling approximately 2,800 travels approximately 680 fee located approximately 3,600	ter moving app thwest of the re 0 feet. Upton's et east, discharg	roximately 2,400 f ceiving catch basir Pond is located ap ing into the Merrir	eet through catch bas n. Surface water in the proximately 3,000 fe nac River at a point le	ins and conduits mair e wetlands enters an et north-northwest of	ntained by MassHighw unnamed brook and di the receiving catch ba	scharges into Upton's sin. Surface water fr	s Pond after om Upton's Pond	

c) Attach a detailed map(s) indicating the site location and location of the outfall to the receiving water: 1. For multiple discharges, number the discharges sequentially. 2. For indirect dischargers, indicate the location of the discharge to the indirect conveyance and the discharge to surface water The map should also include the location and distance to the nearest sanitary sewer as well as the locus of nearby sensitive receptors (based on USGS topographical mapping), such as surface waters, drinking water supplies, and wetland areas.
d) Provide the state water quality classification of the receiving water B,
e) Provide the reported or calculated seven day-ten year low flow (7Q10) of the receiving watercfs Please attach any calculation sheets used to support stream flow and dilution calculations.
f) Is the receiving water a listed 303(d) water quality impaired or limited water? Yes No If yes, for which pollutant(s)? Is there a TMDL? Yes No If yes, for which pollutant(s)?
6. Results of Consultation with Federal Services: Please provide the following information according to requirements of Part I.B.4 and Appendices II and VII.
a) Are any listed threatened or endangered species, or designated critical habitat, in proximity to the discharge? Yes No Lambda No Lamb
b) Are any historic properties listed or eligible for listing on the National Register of Historic Places located on the facility or site or in proximity to the discharge? Yes No Have any state or tribal historic preservation officer been consulted in this determination (Massachusetts only)? Yes No

Please provide any supplemental information.	Attach any analytical data used to support the application. Attach any certification(s) required by the general permit.

8. Signature Requirements: The Notice of Intent must be signed by the operator in accordance with the signatory requirements of 40 CFR Section 122.22, including the following certification:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I certify that I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Facility/Site Name: Mobil Facility S/S #01-E5Y

Operator signature:

Title: Project Manager

Date: 10/24/05

B. Submission of NOI to EPA - All operators applying for coverage under this General Permit must submit a written Notice of Intent (NOI) to EPA. Signed and completed NOI forms and attachments must be submitted to EPA-NE at:

US Environmental Protection Agency RGP-NOC Processing Municipal Assistance Unit (CMU), 1 Congress Street, Suite 1100 Boston, MA 02114-2023

or electronically mailed to <u>NPDES.Generalpermits@epa.gov.</u> or faxed to the EPA Office at 617-918-0505.

If filling out the suggested NOI form electronically on EPA's website, the signature page must be signed and faxed or mailed to EPA at the phone number or address listed in Section I.B. below.

- 1. Filing with the states A copy of any NOI form filed with EPA-NE must also be filed with state agencies. The state agency may elect to develop a state specific form or other information requirements.
- a) <u>Discharges in Massachusetts</u> In addition to the NOI, permit applicants must submit copies of the State Application Form BRPWM 12, Request for General Permit coverage for the RGP. The application form and the Transmittal Form for Permit Application and Payment, may be obtained from the Massachusetts Department of Environmental Protection (MA DEP) website at www.state.ma.us/dep. Municipalities are fee-exempt, but should send a copy of the transmittal form to that address for project tracking purposes. All applicants should keep a copy of the transmittal form and a copy of the application package for their records.
 - 1) A copy of the NOI, the transmittal form, a copy of the check, and Form BRPWM 12 should be sent to:

Massachusetts Department of Environmental Protection Division of Watershed Management 627 Main Street, 2nd floor Worcester, MA 01608

2) A copy of the transmittal form and the appropriate fee should be sent to:

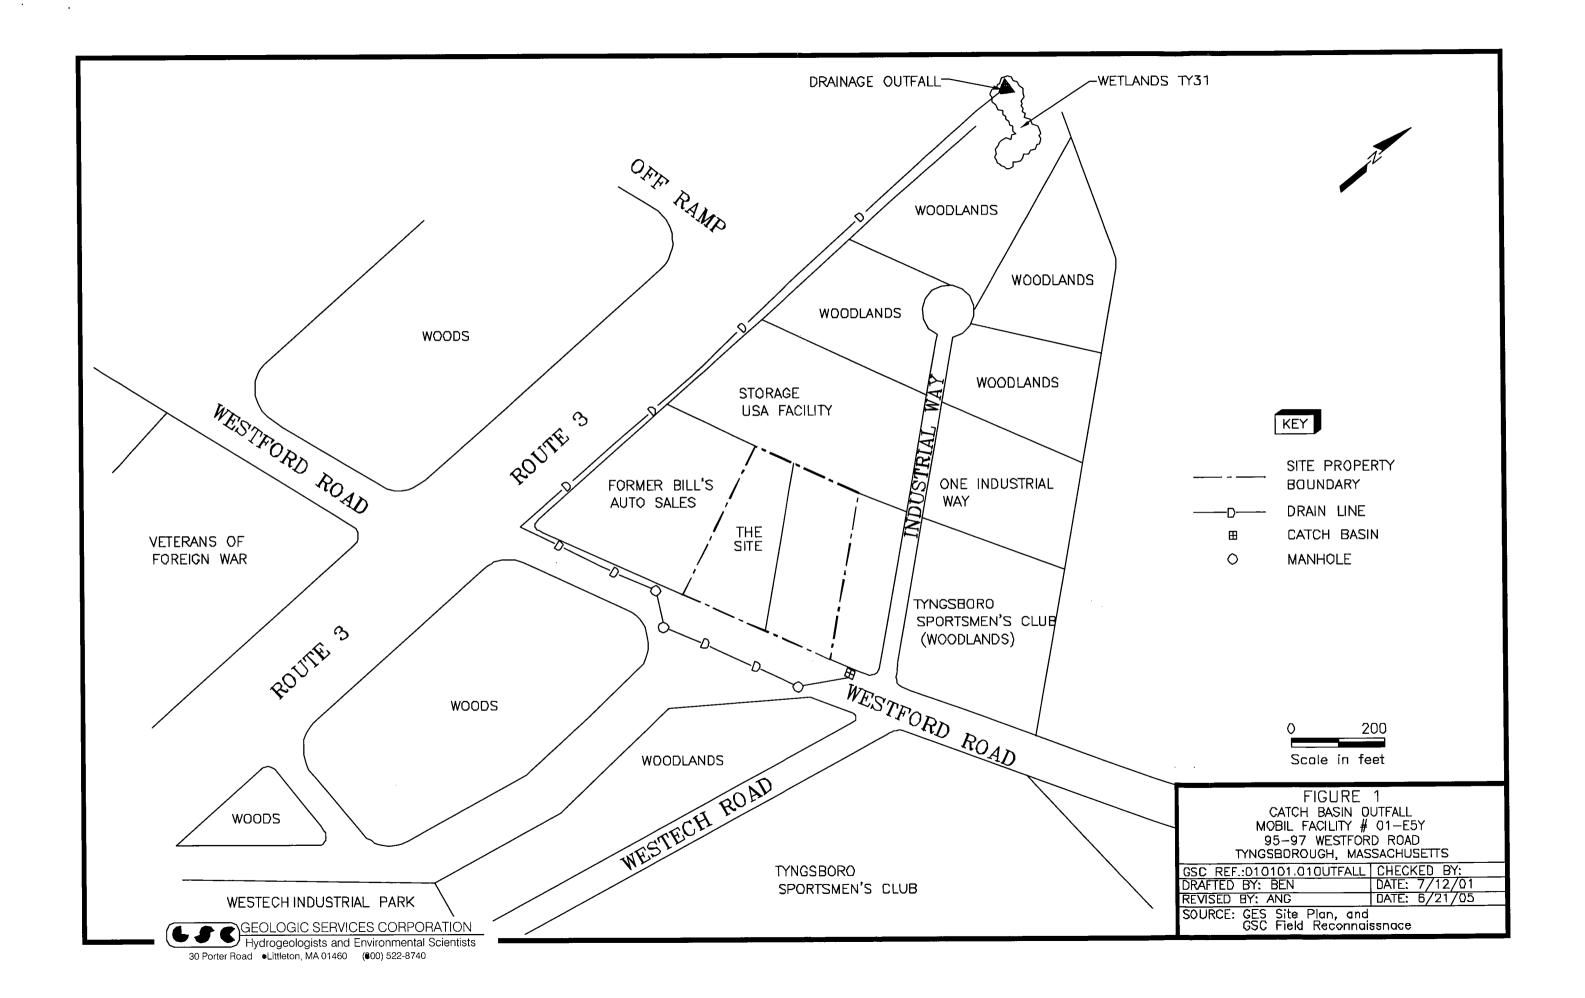

Massachusetts Department of Environmental Protection P.O. Box 4062 Boston, MA 02111

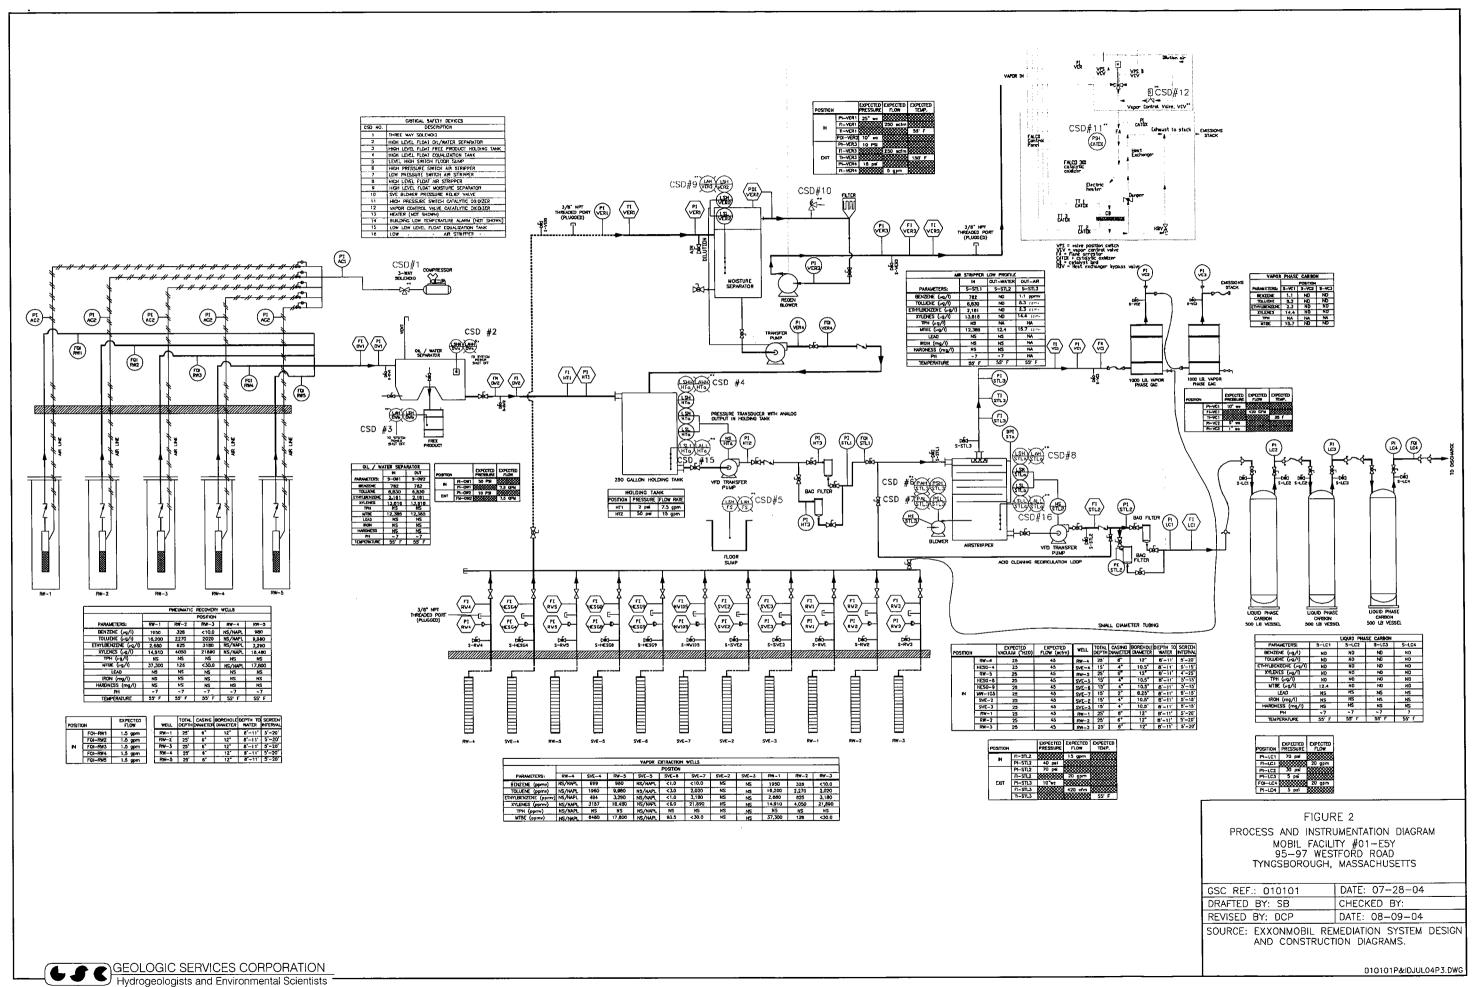

Please note: Applicants for discharges in Massachusetts should note that under 310 CMR 40.000, as a matter of state law, the general permit only applies to discharges that are not subject to the Massachusetts Contingency Plan (MCP) and 310 CMR 40.000. Therefore, discharges subject to the MCP are not required to fill out and submit the State Application Form BRPWM 12 or pay the state fees. However, they must submit a NOI to EPA.

b) <u>Discharges in New Hampshire</u> - applicants must provide a copy of the Notice of Intent to:

New Hampshire Department of Environmental Services Water Division
Wastewater Engineering Bureau
P.O. Box 95
Concord, New Hampshire 03302-0095.

2. Filing with Municipalities - A copy of the NOI must be submitted to the municipality in which the proposed discharge would be located.
